Plastics Processing

Worldwide "New process" for the recovery of copper, with 97% purity from cable grinding material.

(Residual Material from Cable Recycling)

The Material being Treated is disposal material, which has been directed to Landfills and Burns for 40 Years.

Due to the Recent Changes in the Regulations, to The disposal of Landfills, this Result has emerged, the Previous Removal of the Copper Before it is Disposed of.

This Procedure is unique in the World of NEW and Unique.

It is a Dropout Process and contains very little Energy Costs.

There is an Overall Concept, which proves all the Details, due to actions and Transactions that have already Been taken, it can be implemented immediately.

The Disposal Material to Be treated Is also supplied in its Entire Quantity, again to the Economy, i.e. sold.

The Economic Gain is in the first Lienie, in the case of the Copper obtained.

Daily Profit in Tons of Copper about 5.5-6.0 Tons
