## **Advertising on public transport Regional**

World first unique - Only possible with us.  
Regional licenses nationwide.

Commercial providers use this regional advertising media in public transport to present their products or services and thus to present themselves to potential customers in their region. Searchers can use the information as a stimulus for decision-making.

We have divided the market into regions. These are identifiable by a delimitation feature and are protected for the respective licensee and regional partner. Sales-oriented personalities who know the respective market and its people find a unique opportunity to build their own existence.

Licence costs are calculated according to the population of the region, per inhabitant 0.10 € (once, limited to 5 years) .
