Look for Corporate co-operation, firm cooperation

Mechanical engineering, drying technology for web-shaped materials

We are a medium-sized company with the core competence of the design and manufacture of textile finishing systems. In this way, we are looking for cooperation with companies to further develop or supplement our plants in order to be able to operate them more energy-savingly. Alternative methods for recovering the energy used are also possible. In addition, we are looking for cooperations with companies/ users to expand the application areas of our dryers outside the textile environment. In our modernly equipped production site, plant variants or new constructions can be produced at any time.

[Co-operation](#)

Region 71, Germany
