Look for Corporate participation, firm participation

Online portal

I am a successful Internet entrepreneur and am looking for web ideas from abroad in order to implement them in Germany (+ other countries).

These must already be demonstrably very successful in the respective country and must not yet be present here either, not so similar. So please don't have fixed ideas that might work, but really very well thought out and researched.

Of course, it would also be possible to have completely own ideas, here it is very well thought out and of course researches even more.

My strengths are above all Internet marketing, especially the quick announcement of pages and brand names on the Internet and other media. Top placements in search engines etc. Professional programming, layout, etc. are 100% guaranteed, capital is also available. I participate both actively and passively.

Please write me with complete contact details and as specific information as possible.
