

The big business marketplace

Business for sale more than 15 years

ID 9912

Look for Corporate financing, investor **Accounting, company Software**

Very valued Investor, we are now in what is probably a typical Phase of starting a Business.

Started just over a year ago with a lot of Enthusiasm and a nice Sum of Equity, the Product just before Completion and the available Investment Money is dwindling away. What to do? Of course, we must now try to leave the Suitcases in the Basement and let ourselves be supported from a competent Side.

It would be a pity for The work, the Capital invested and, last but not least, the Chances Of success that our Product promises, should we cancel the Tents and say Servus.

What do we develop?

In Short: An accounting or Company Software that dwarfs the previous Market leaders.

That sounds too optimistic?

There are too many Competing Products? Well, the Better is always the Good Enemy, as they say so beautifully.
